The Power of Blue.®

Designed for fleet owners that demand the ultimate in reliability and performance.

NEW! Factory standard features on select models:

Automatic idle reduces fuel consumption and noise level along with prolonging the engine life.

Engine gauges indicate engine oil pressure, coolant temperature and battery charging voltage.

Enclosed robust case design protects internal components from impact and allows air flow to cool and prolong the life of the engine. Also reduces sound levels.

Quick and easy maintenance with single-side access to oil level check, oil fill, oil filter, fuel filter and air cleaner.

Remote toolless oil drain allows oil to be drained without getting under the engine and reduces the chance of oil spillage.

Big Blue 302 CC/CV Deluxe Model

Perkins

Heavy duty industrial engine choices designed, built and proven to operate over 10,000 hours before the first basic overhaul.

Arc-Drive makes welding easy. Automatically enhances Stick welding, especially on pipe, by focusing the arc and preventing the electrode from going out.

Hot Start™ provides positive Stick electrode starts making it easy to start all types of electrodes and it also works great for bead tie-ins.

Weatherproof Lexan® nameplate resists cracking and fading, and is color-coded for ease of operation.

GFCI receptacle as required on most job sites to protect operators from electrical hazards.

CSA, IEC and NEMA compliant for welders. Degree of protection provided by enclosure IP23.

TRUE BLUE®
3YR. WARRANTY

Additional Features

One MIG welding range allows precise voltage control for welding with .023–.120 in (0.6–3.2 mm) wires.

A multi-colored **process selector control** allows quick and easy process changes without having to use multiple switches.

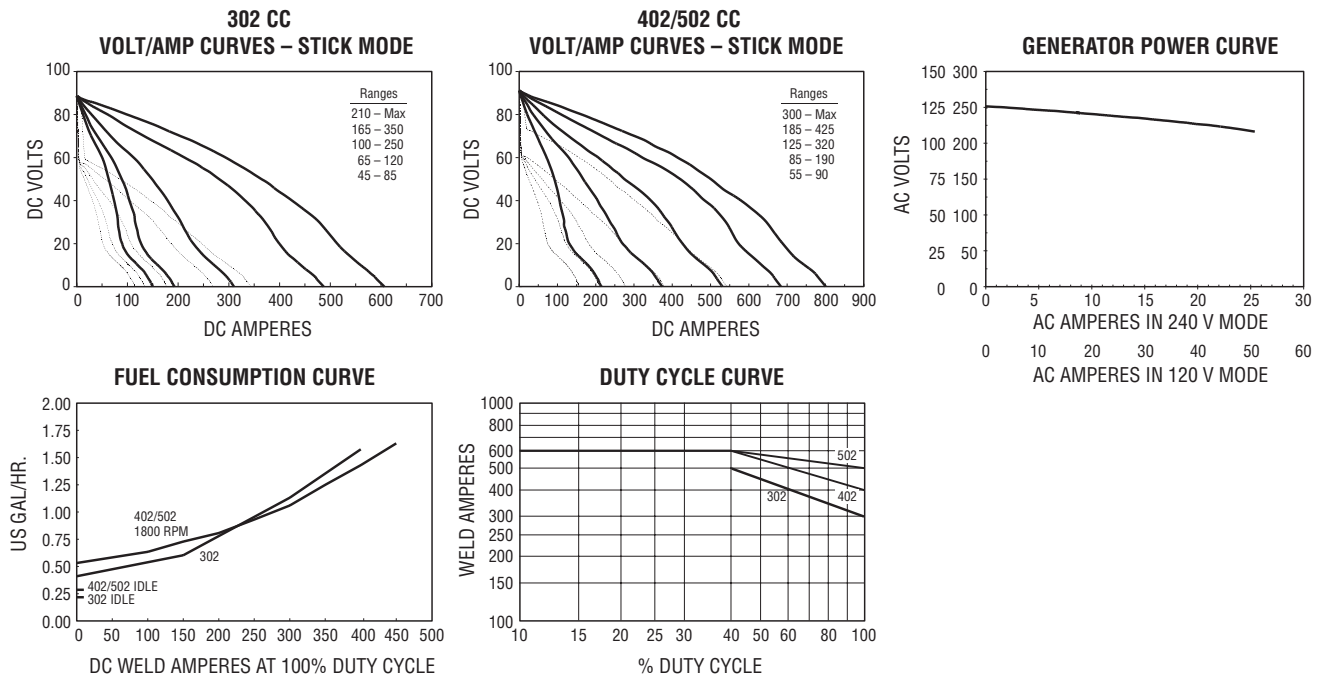

Solid-state control provides enhanced arc characteristics that include more dig in the Stick mode with smoother and lower amperage in the TIG mode. Extreme conditions will not cause the output to change, eliminating the need to periodically turn the heat up.

The rugged solid-state control board is housed in a **sealed vault**. The vault's sealed connections are made through watertight plugs that make this component impenetrable to dust and moisture.

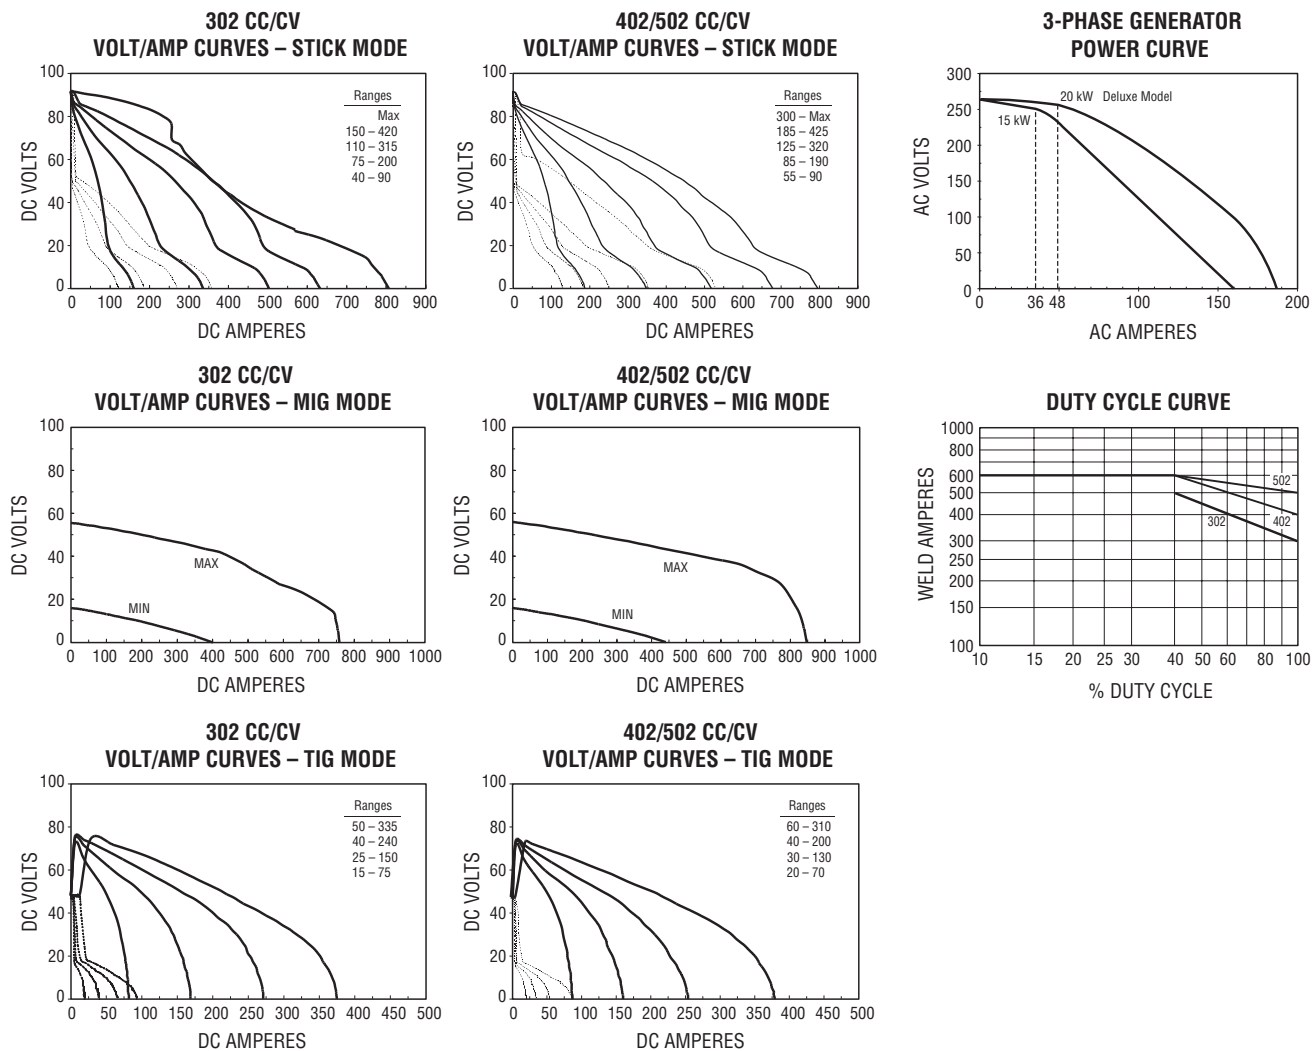

14-pin remote control allows precise adjustment of amperage or voltage, along with contactor control, without walking back to the machine.

*Optional on select models.
